A New Whistle for Thomas

Instructions for Battery Replacement

A child should never use this product unless the battery compartment cover has been properly secured. Only an adult should replace batteries. Use a Phillips screwdriver to remove the screw. Open the battery compartment cover. Remove old batteries and dispose of immediately. Install new batteries with the plus (+) sign facing up. Close the cover and secure it with the screw. Do not mix old and new batteries. Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries. Do not recharge non-rechargeable batteries. Do not use rechargeable batteries. If batteries are swallowed, in the USA, promptly see a doctor and have the doctor phone (202) 625-3333 collect. In other countries, have the doctor call your local poison control center. This product uses two AG-10 button cell batteries (2 x 1.5V = 3V). Use batteries of the same or equivalent type as recommended. The supply terminals are not to be short-circuited. Batteries should be changed when sounds mix, distort, or become otherwise unintelligible as batteries weaken. The electrostatic discharge may interfere with the sound module. If this occurs, please simply restart the sound module.

In the European market the dustbin symbol indicates that batteries, rechargeable batteries, button cells, battery packs, etc. must not be put in the household waste. Batteries containing hazardous substances are harmful to the environment and to health. Please help to protect the environment from health risks and tell your children to dispose of batteries properly and take them to the local collecting points. Batteries are recycled safely in this manner. The chemical symbols Hg (Mercury), Cd (Cadmium) or Pb (Lead) shown on the dustbin symbol indicate that the content of that chemical exceeds a certain limit.

Conforms to the safety requirements of ASTM F963-08.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio TV technician for help.

A New Whistle for Thomas

publications international, ltd.

It was morning and time to start the day.
But Thomas woke to hear that his whistle did not
sound well at all. Sir Topham Hatt told Thomas
to visit the mechanic.

"You simply must get that whistle fixed!"
he said, covering his ears.

*He's a Really Useful engine, you know,
All the other engines they'll tell you so.
He huffs and puffs and whistles,
Rushing to and fro.
He's the Really Useful engine we adore.*

*He's the one, he's the one,
He's the Really Useful engine that we adore.
He's the one, he's the number one,
Thomas the Tank Engine.*

Thomas headed off to the mechanic. But on the way, he spotted Henry struggling up Gordon's hill with a heavy load. Thomas tried to whistle and offer help, but Henry could not hear the little squeak. Finally, Henry noticed Thomas.

"I'd love some help," said Henry as Thomas gave him a push.

After a little while, Thomas was once again on his way to the mechanic. Around a bend, he noticed Percy. He had run off his track and through a buffer.

"Can you help me, please?" asked Percy.
Thomas quickly pulled Percy back on track.
"Thanks, Thomas!" called Percy. Thomas
squeaked out a good-bye.

Next, Thomas saw Bertie, sitting near the tracks.

“Oh, Thomas, I’m glad to see you,” said Bertie. “I’m overheated.”

Thomas’ driver offered some of Thomas’ water to refill Bertie’s steamy radiator.

“I hope you sound better soon!” called Bertie as Thomas left. Thomas frowned. He was having such a busy day, he almost forgot about going to the mechanic!

Thomas was surprised when the mechanic made time for him right away.

"Pull right in, Thomas!" said the mechanic.
"We heard all about how you helped your friends today. Now, let's take a look at that whistle of yours."

In no time at all, the whistle was fixed.
Thomas let out a practice whistle. It was loud and clear. Thomas had his whistle back!

*He's a Really Useful engine, you know,
All the other engines they'll tell you so,
He huffs and puffs and whistles,
Rushing to and fro.
He's the Really Useful engine we adore.*

*He's the one, he's the one,
He's the Really Useful engine that we adore.
He's the one, he's the number one,
Thomas the Tank Engine.*

**Sing along with the story
as Thomas gets a new whistle**
